

Functional Barrier

Barrier coextruded films with high functional barrier performances that guarantee the food product safety.

Specifically, the FUNCTIONAL BARRIER is considered as:

- Barrier to external contaminant like mineral oils coming from recycled carboard.
- Barrier to the aggressive component of the food packaged

Barrier to external contaminants

- PP based with low sealing characteristics for high-speed packaging.
- reduced thicknesses
- printable surface
- shelf life
- high transparency
- prolonged organoleptic characteristics of the packaged product (fragrances, taste)

Barrier to the aggressive components

- PE based with high barrier to the acid components.
- preserve the high bond among the laminated layers
- white version
- low seal
